PROFESSIONAL SUMMARY

Statistics student with project and internship experience in data analytics, machine learning, databases, dashboards, and data-driven applications. Comfortable working with Python, SQL, Power BI, Tableau, and AppSheet to analyze data and develop practical data solutions.

EDUCATION

Prince of Songkla University

B.Sc. in Statistics, Faculty of Science
Hat Yai Campus | 2023 – Present

GPA: 3.22

Hatyaiwittayalai Somboonkulkanya School

Science–Mathematics Program
| Graduated 2023

TECHNICAL SKILLS

DATA ANALYTICS & STATISTICS

• Python • R • EDA • Data Cleaning • Regression
• Statistical Analysis • Multivariate Analysis
• Machine Learning • Time Series

PROGRAMMING & DATABASE

• SQL • MySQL • PHP • JavaScript • HTML
• CSS • phpMyAdmin

VISUALIZATION & BI

• Power BI • Tableau
• Dashboard Development

APPLICATION & DATA TOOLS

• AppSheet • Google Sheets • Excel • Google Colab
• GitHub • VS Code • SPSS • Minitab • RapidMiner
• PowerPoint • Word • Canva

EXPERIENCE

Intern | Physical and Environment Division, Hat Yai Campus

Prince of Songkla University | Apr 2025 – Jun 2025

Supported transformer data management and developed an AppSheet-based application for inspection and maintenance workflows using Google Sheets, GPS/Google Maps, digital forms, PDF reports, and dashboards.

Teaching Assistant | Department of Mathematics and Statistics

Prince of Songkla University | Jun 2026 – Present

Supported SQL and Fundamental Statistics courses through classroom assistance, software demonstrations, assignment review, score checking, and student guidance on SQL queries and statistical exercises.

Field Data Collection Assistant | Enumerator

Private Sector Research Support | 2023 – Present

Conducted structured field interviews, screened respondents based on specified demographic and sampling criteria, and checked survey data for completeness and accuracy.

SELECTED PROJECTS

1

Transformer Location & Data Management Application

AppSheet • Google Sheets • Google Maps • Data Management

Developed an AppSheet-based application to manage transformer asset, inspection, and maintenance data, integrating GPS/Google Maps navigation, digital field forms, automated PDF reports, and real-time dashboards.

2

Term Deposit Subscription Prediction

Python • Decision Tree • Random Forest • Scikit-learn

Compared Decision Tree and Random Forest models for term deposit subscription prediction. The selected Decision Tree achieved 75.0% Recall for the subscriber class.

3

Apartment Management & Dashboard System

Database & Web Application Project | PHP • MySQL • SQL • HTML • JavaScript • phpMyAdmin

Developed a database-driven apartment management system to manage room, customer, rate, and billing data, with a dashboard displaying KPIs, charts, and tables.

4

Electricity Demand Forecasting in Southern Thailand

Time Series Forecasting Project | Excel • Minitab • Statistical Modeling

Compared four forecasting methods for hourly electricity demand. Holt-Winters Additive was selected based on training performance and evaluated on the test set.

5

Netflix Content Analysis Dashboard

Data Visualization Project | Tableau • Data Analysis • Interactive Dashboard

Developed an interactive Tableau dashboard to explore Netflix content by country, content type, genre, audience rating, actors, directors, and trends over time.
